Selvi Karuppaswamy Named Assistant Director of Applications Development

Selvi Karuppaswamy has been named assistant director of Applications Development within the Judiciary's Information Technology Office, Judge Glenn A. Grant, acting administrative director of the courts, announced today. She succeeds Lisa Mollica, who is retiring June 30 after 28 years with the Judiciary.

"Lisa Mollica has served the Judiciary during a critical time in the development of our proprietary applications," said Judge Grant. "She has played a critical role in the development and enhancement of all of our applications that serve our courts, from our Supreme Court to the municipal courts, and we are grateful for her many years of outstanding service."

As assistant director, Karuppaswamy will oversee the Judiciary's information technology applications portfolio, including development, implementation and support. Judiciary applications serve more than 150,000 internal and external users, including law enforcement and other government agencies, attorneys, and the public.

"New Jersey's Judiciary is an acknowledged leader in the innovative application of technology solutions to improve service to our users," said Judge Grant. "Selvi has taken a leadership role in the latest of these applications, our eCourts system, which enables us to file, manage and store cases electronically. Her proven leadership skills and technical knowledge will enable her to oversee our other applications with equal success."

Karuppaswamy holds a bachelor's degree in electrical and electronics engineering from the University of Madras in India and a master's degree in computer science from Wayne State University in Michigan. Prior to joining the Judiciary she was a systems engineer and information specialist at EDS/HP and a solutions architect for GMAC. She joined the Judiciary in 2007 as a project manager in the Information Technology Office.

"I am very excited about leading our applications teams to develop better solutions for our users," said Karuppaswamy. "I want to thank Lisa for her guidance and encouragement and my colleagues for their ongoing support."
